

SHEFFMED

Environmental Policy

Sheffmed Ltd recognise that our operations influence the local, regional and global environment.

Commitment to Continuous Improvement and Pollution Prevention

The management are committed to continuous improvements in environmental performance and the prevention of pollution.

Commitment to Legislative and Regulatory Compliance

Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.

Specific Policies

- Use of environmental management tools: We will implement our policies through a coordinated environmental management system.
- Energy Use: The company will use environmentally safe and sustainable energy sources to meet our needs. We will invest in improved energy efficiency of products we use and sell.
- Responsibility for products: The company considers the environmental impacts of its products at all stages of their lifecycle – from design to manufacturing, customer use, and finally disposal.
- Resource consumption: The company will seek to address its impact on the environment through the adoption of a sustainable procurement policy. We will conserve resources through efficient use and careful planning.
- Recycling: The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.
- Disposal of waste: We will minimize waste, especially hazardous waste, and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods.
- The supply chain: We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.
- Training personnel: We will implement our policies through guidelines and training.
- Targets and Goals: The company will set environmental targets and goals designed to improve our environmental performance.
- Transportation: Through coordinating route planning and delivery schedules this company seeks to realise the dual benefits of reduced fuel consumption and lower exhaust emissions.
- Treating emissions: The company is committed to reducing emissions from industrial processes.
